

The Amazing Coral Reef

Coral, bright and surprising,
A purple sea fan sways from side to side in the current,
Coral polyps using their tentacles to get some food,
A little red seahorse camouflaged in the bright red coral,
A school of bigeye squirrelfish swims past with excitement,
A grey reef shark going out for a bite to eat,
A huge stingray swims with its fins going up and down,
A moray eel sticks out its head to see if food is passing by,
An enormous green sea turtle swims up gracefully for a breath,
A sea anemone is eaten by a wandering starfish,
A turquoise parrotfish gets ready to munch on coral,
Another parrotfish with all the colours of the rainbow swims by,
A pufferfish all puffed up watches a scuba diver swim past,
A spiny lobster scurries among the coral,
A small reef squid inks the ocean,
An incredibly huge sponge sits silently among the fish,
Awesome manta rays glide toward the surface looking for food,
Beautiful, shiny barracuda swimming in a school,
A gray barracuda speeds by like a torpedo,
Tiny snappers dash in and out of coral,
Flying fish fly straight out of the water,
Lionfish scavenging for some other fish eggs,
A playful dolphin jumps the waves in the light blue sea,
All of this and more in the incredible coral reef,

WE LOVE THE CORAL REEF!!
